Automated Software Engineering, and Web-oriented Research, in order to facilitate the cross-fertilization and the advancement of hybrid methods that combine the three areas. The workshop was attended by 25 participants from 8 countries: Canada, France, Germany, Italy, Poland, Spain, The Netherlands, USA. The previous editions of the WWV series took place in Valencia, Spain, in March 2005 and in Paphos, Cyprus, in November 2006. A selection of the papers presented at WWV'05 appeared as volume 157, issue 2, of the Elsevier Science series Electronic Notes in Theoretical Computer Science (ENTCS) and a selection of the papers presented at WWV'06 appeared as a volume of the IEEE Computer Society, ISBN 0-7695-2826-0.

The Program Committee of WWV'07 selected 9 papers from 16 submissions. Each paper was reviewed by, at least, three members of the Program Committee, with the help of some additional referees. In addition to the selected papers, the scientific program included two invited lectures by Paolo Traverso from the Center for Scientific and Technological Research (ITC-IRST), Italy, and Joost Visser from the Software Improvement Group (SIG), The Netherlands. We would like to thank them for their invited talks. Moreover, we are especially grateful to Joost Visser for his contribution to the post-workshop proceedings.

We would also like to thank all the members of the Program Committee and all the referees for their careful work in the review and selection process. Many thanks to all the authors who submitted a paper and to all the conference participants. We gratefully acknowledge all the institutions and corporations who have supported this event.
